EDUCATION

University of Washington

Bachelor of Science in Computer Science, Minor in Business Administration

Seattle, WA

Sep. 2022 – March 2026

EXPERIENCE

Software Engineering Intern

USAA

May 2025 – August 2025

San Antonio, TX

- Developed and owned a G-force visualization that converts raw telematics data to real-time and interactive timeline charts, helping adjusters interpret force magnitude/direction; designed to improve estimates and arbitration.
- Co-inventor on USAA filed patent (pending) for G-Force visualization project
- Developed a proof-of-concept telematics member dashboard to integrate multiple data sources into a single user-facing interface to streamline member experience
- Completed Dark Mode Analysis & Design to identify problematic components in SafePilot iOS mobile app

Software Engineer

REV Delivery

March 2024 - September 2024

Seattle, WA

- Sole developer and maintainer of a React Native TS mobile app for a high-growth scooter delivery startup
- Generated over \$1M of in-app sales in 1st year, scaling from 0 to 8k+ users and handling 10k orders per month
- Saved company thousands and avoided T.O.S. issues by quickly resolving critical problems, including fixing login flows for 6,200+ non-unique existing website accounts and transitioning payment processors to Stripe
- Company acquired Duffl (YC W20), now expanding nationwide

Product Management Intern

MESH Fantasy Sports

October 2024 - April 2025

Seattle, WA

- Revamped MVP into a v2 release, unlocking thousands in sponsor funding
- Led user research, redesigned UX in Figma, and collaborated with a team of 3 to implement new features

President, Bubble Bash Guild

Seattle Children's Hospital Guild Association

September 2023 - April 2025

Seattle, WA

- Raised \$150,000, making us a top 30 (of 230) grossing guild over 2 annual auctions with 300+ total attendees
- Founded year-round volunteering initiative supporting hospital playroom activities
- Personally volunteered 300+ high-impact hours in addition to fundraising work

PROJECTS

EmojiGen

March 2025 - May 2025

- Built open-source alternative to Apple's Genmoji, leveraging DreamBooth LoRA finetuning and Retrieval Augmented Generation (RAG) with precomputed CLIP embeddings on 1900 emoji-caption pairs
- Created CLI tools (`emoji-gen`, `emoji-dev`) enabling streamlined emoji generation and model fine-tuning workflow

Ripple

November 2024 - May 2025

- Developed peer-to-peer marketplace app for UW students, attracting 400+ active users, facilitating thousands of dollars in exchanges, and receiving university media coverage
- Placed 18th (of 180 teams) at UW's Dempsey Startup Competition.
- Headlining presenter at DubHacks Next Demo Day
